

ENTERPRISE REMOTE DESKTOP SOFTWARE

Provide fast remote support for your clients within seconds, access an unlimited number of remote computers or mobile devices, generate leads, reach your website visitors and improve internal communication via live chat, and host online meetings or webinars.

■ CROSS-PLATFORM REMOTE DESKTOP

Access and control any Windows, Mac, or Linux computer in seconds from your computer or mobile device.

■ MINIMUM 99.95% UPTIME

Hosted by more than 50 data centers around the world, assuring 24/7/365 availability and at least 99.95% uptime. We achieved an average uptime of 99.98% in the past five years.

■ DEALING WITH SENSITIVE DATA?

It is our top priority to assure you the highest level of remote desktop security, protecting your remote connections with AES 256-Bit End-to-end Encryption. If you need to keep your data in a closed corporate environment, we offer you self-hosted Server License, which gives you total privacy and independence.

■ GET EXACTLY WHAT YOU WANT

We enable you to integrate our technologies with leading third-party solutions via API.

■ 24/7 SUPPORT JUST FOR YOU

If you are looking for a little extra, the Premium Support service guarantees a two-hour response time 24x7, 365 days a year.

■ WHY?

With our no hidden cost policy, ISL Online is the easiest and best way to go. You may run ISL Online software on an unlimited number of computers or mobile devices, connect to an unlimited number of computers and create an unlimited number of operators that may host a session. All you need to know is how many simultaneous connections you need during your peak time to improve efficiency.

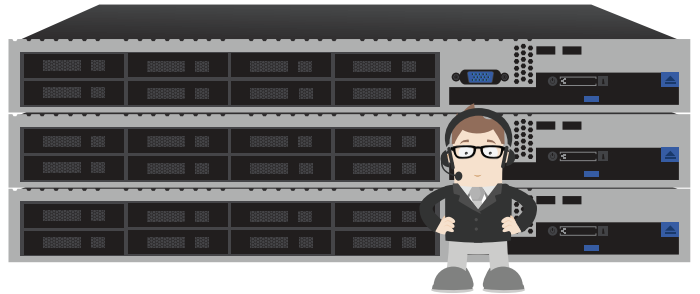

MOBILE DEVICES INCLUDED

Connect from your computer to any iPhone, iPad or Android to provide mobile device support, or access and control any remote computer from your iOS or Android Mobile device.

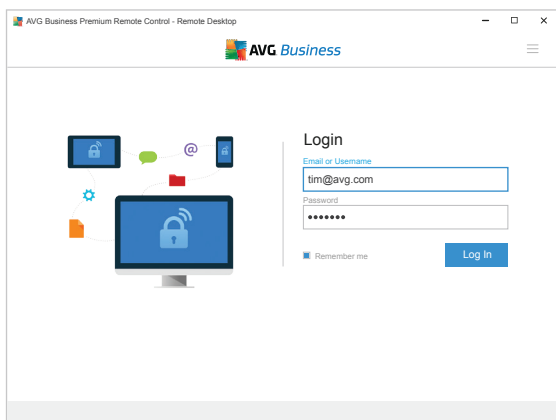

UNLIMITED CONNECTIONS

Our unique Corporate Server License provides you with an unlimited number of licenses satisfying strict security requirements and giving you full independence by installing ISL Online on your server(s).

AVG - OEM CUSTOMIZATION

AVG® Technologies N.V. has integrated ISL Online's remote desktop control into AVG Business Managed Workplace to give Managed Services Providers (MSPs) the ability to easily access and control an unlimited number of unattended remote computers.

OUR USERS

"We are very satisfied with the product we have chosen. The ISL Online remote support tool ISL Light offers reliability, high speed and high quality screen sharing and session recording, while the product is extremely easy to use."
